

Torture For Exerting Right To Assemble **By Michael Treis**

George Orwell's 1984 a nightmare world of a police state controlling and watching every move of the people has nothing on today's crowd control and intelligence systems.

The Homeland Security invoked to "protect" US since 9-11 is not directed at those who wish to commit terror attacks but rather the American populace as a whole. Cameras every half-mile along the freeway to monitor "traffic flow" is nothing new. We simply accept it, although it can also take your license plate number and a facial recognition photos through your windshield. Cameras at traffic lights that take pictures of you and your car as you fudge on the speed limit or run the light, then a ticket arrives by mail is nothing new either.

Cameras in homes sent by wireless to your computer being captured by local authorities to monitor your actions at home is rather new but you say you have nothing to hide. Phones tapped from the day they are installed since 1993 communications act is old news. BUT you just found out that the local authorities have been caught gathering fingerprints from you and many others wireless laptop computer's fingerprint recognition "sign in." They have gone one step to far and you're not going to take it any more! So...

Now we have peaceful demonstrators exercising right of the people peaceably to assemble to protest this un-Constitutional invasion of their privacy. Suddenly the local cop force brings out their new Active Denial Technology against the crowd.

Active Denial Technology (ADT) uses a transmitter producing energy at a frequency of 95Ghz and an antenna to direct a focused, invisible beam towards the crowd. Traveling at the speed of light, the energy reaches the subject and penetrates the skin to a depth of less than 1/64 of an inch. Almost instantaneously it produces a heating sensation that within seconds becomes intolerable. Members of the crowd are directed to move in a certain direction moving out of the beam and the pain stops. However many still in the

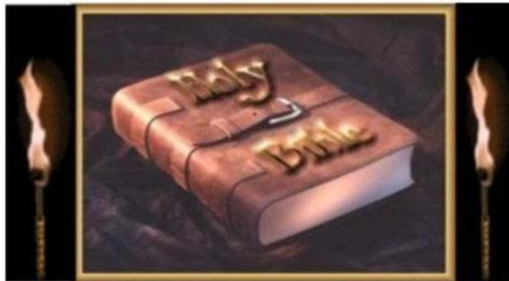

beam area fall to the ground tortured and writhing in pain and are unable to move out of the beam. Their eyes are irreversible damaged; they are in unbearable pain for minutes. The Jackbooted thugs come over (after switching off the beam) and spray them with sticky foam pepper spray that doesn't wash or wipe off. As the protesters writhe in pain, they are hand cuffed and hauled off and the crowd dispersed with the ADT.

Science fiction? No the Raytheon Company is the lead integrator (they and other investors are also responsible for Iridium satellite that monitors their implantable micro-chip RFID). They've used ADT at G-8 Summit protests.

So what are we left with? Our Constitution has been used for toilet paper for over 60 years. Little by little wiping this Right away and that Right away through this new law to "protect us" of that new statute to "keep us safe". With the Patriot Act 1, 2 and other "9-11 bills" our wonderful Constitution has finally been flushed down the toilet. Why?

Because we are too self-consumed to give a tinkers damn about anyone else when we see his or her rights violated because it isn't us. Because we allow our God given rights to be taken away without so much as a whimper. What kind of cowards have we become? People, our forefathers, relatives and countrymen have given their very LIVES to protect what God has given us. Yet we have allowed the Common Law, based on the 10 Commandments, God's Law, to be replaced with the Uniform Commercial Code and various un-constitutional statutes of man. We have allowed morals and the 10 Commandments to be taken from schools and our children, and even public display because of "separation of church and state" that does NOT even exist in the Constitution. So now you wonder why kids kill each other and we're being placed in bondage? Get real!

Yahweh the Ever Living God of Abraham, Isaac and Jacob foretold long ago what happens to countries that turn their backs on Him and His' Law. Try reading Leviticus if you don't believe me. WAKE UP America before you're destroyed!
