Join us to hear how the U.S. war and occupation of Iraq are in reality the culmination of decades of aggression by the United States and European powers. Having declared endless war on the world, spending billions for world conquest, killing and wounding hundreds of thousands of innocent civilians, social services in the United States continue to be drastically cut.

Behind the current right-wing agenda of promoting racism, denying civil rights to immigrant workers and their families, attacking women, reproductive rights and LGBT equality, the Bush administration is working on behalf of Wall Street and the corporate elite to loot and destroy Social Security. Medicare and many other social programs fought for and won by workers through decades of struggle will be next unless an effective struggle can be organized to fight back.

Hear about the growing movement of youth and students, seniors, and workers everywhere aimed at shutting down the Bush program of endless war abroad and escalating cutbacks at home.
